

Tool A: Existing Conditions**Chollas Creek Metals TMDL Implementation Plan**

Figure A-6. Chollas Creek Watershed Priority Sector Map

This figure is a planning tool which delineates the relative potential threat to water quality in Chollas Creek watershed. Watershed activities should be implemented in high priority sectors first (Sector 1 has the highest priority and Sector 5 the lowest relative priority). Since the TMDL applies to all waters of the Chollas Creek, watershed activities will be implemented across all sectors.
